

Ulrich Sax

University Medical Center Göttingen
Department of Medical Informatics

Biography

Diploma in Medical Informatics at Universität of Heidelberg. After four years working as head of IT in a Regensburg Hospital PhD thesis at Göttingen University in 2002. Postdoctoral studies in the Harvard-MIT science and technology program in Boston, MA, USA. Then assistant professor at University Medical Center Göttingen (UMG). Additionally, six years heading Medical Computing center at UMG. Since 2011 associate Professor in Medical Informatics, heading the Translational research Informatics group (TRI).

Prof. Dr. rer. nat. Ulrich Sax' research is currently focused on the integration and visualization of heterogeneous high dimensional omics and phenotype data in healthcare and biomedical informatics research. His firsthand experience of heading two IT-departments additionally to his research offers an ideal combination of IT production experience and substantial research experience in many interdisciplinary research collaborations dealing with privacy and security aspects in Biomedical informatics, Leading roles in national research collaborations like TMF, NFDI4health and DFG collaborative research units.
