Barbara Magagna

FAIR Development Coordinator, GO FAIR Foundation

Biography

Barbara Magagna is FAIR Development and Fellowship Coordinator in GO FAIR Foundation with a background in landscape ecology, GIS and semantics. She is a trainer of the Three-Point FAIRification Framework, for which she developed core components.

In European projects (ENVRI, eLTER-PLUS, PARC) she helps to FAIR assess data and services and to develop semantic frameworks. She is the chair of the RDA WG I-ADOPT, which published RDA-endorsed recommendations based on I-ADOPT, a crosswalk which facilitates the interoperability of observational data by offering a systematic syntax for expressing FAIR observable properties.
