

Dimitris Koureas

Managing Director, Naturalis Biodiversity Center

Biography

Dr. Dimitris Koureas specialises in digital innovation for research and research infrastructures. He currently serves as managing director for Digital and Chief Information Officer at Naturalis Biodiversity Center in the Netherlands and as the Executive Director of the Distributed System of Scientific Collections (DiSSCo) European Research Infrastructure.

Dr. Koureas has extensive experience in biodiversity informatics. His career includes senior management roles in several European projects focused on data and infrastructures. He is co-chair of the FAIR Digital Object Forum and has served as chair of the Biodiversity Information Standards (TDWG) and as a board member of various international organisations. As an invited lecturer, he taught biodiversity data science and geosciences at various European universities.
