Diego Scardaci

EGI Foundation, The Netherlands

Biography

With his team, Diego works with technology providers and research & innovation projects for technology scouting, innovation of existing EGI services and the piloting of new services and solutions following user and service provider requirements. He is responsible for the definition and implementation of the EGI Technical Annual Plan. He has been involved in EOSC activities since its conception. He is currently the coordinator of the EOSC Beyond project, started in April 2024, that has been funded by EC to develop the next generation of EOSC Core services and piloting EOSC as a network of Nodes. He is also co-chair of the EOSC-A Technical and Semantic Interoperability Task Force. In the past, he co-chaired the Technical Interoperability of Data and Services EOSC Association Task Force, the EOSC Future technical coordination board and the EOSC-hub activity management board. He is also involved in the consortium selected for the Lot 1 of EOSC Procurement, in charge of delivering the EOSC Core Platform part of the EOSC EU Node. Before joining EGI, Diego worked with INFN and in the R&D center of the Telecom Italia group. Diego holds a Master's degree in Computer Science Engineering from the University of Catania.
