

# Andy Götz

ESRF + EOSC-A

## Biography

Andy has been developing software since the mid-1970s, and has been an active supporter of Open Source software and the development of Open Source software to benefit science and society throughout his career. He started off as a radio astronomer before switching to photon science. He has worked at the European Synchrotron since 1988 in the fields of control, data processing and management. At the ESRF he currently manages the data management and data automation team. Since 2019 he has been coordinating the Photon and Neutron Open Science Cloud (PaNOSC) as part of the EOSC project to make FAIR data reality by implementing scientific research data management for Open Science. Since 2023 he is co-chairing the PaNOSC community for the photon and neutron sources. In 2024 he was seconded part-time to work for the EOSC-A on the EOSC Federation Handbook.
