

# Álvaro López García

Spanish National Research Council, Spain

## Biography

Alvaro Lopez Garcia, PhD, is a CSIC Tenured Scientist and head of the Advanced Computing and e-Science Group at the Institute of Physics of Cantabria (IFCA), associated with the Spanish National Research Council (CSIC) (IFCA, CSIC-UC).

His main research interests are focused on the implementation, development and promotion of advanced computing services for science and research, exploiting distributed infrastructures over the computing continuum. Some of the tools, services and platforms that have been developed in this regard are being used in pan-European production e-Infrastructures (like the EGI.eu Compute Service) or are being exploited by end users in the context of the EOSC.

He has participated in more than 20 EU projects (FP7, Horizon 2020, Horizon Europe); noteworthy being the project coordinator of the H2020 DEEP-Hybrid-DataCloud and the Horizon Europe AI4EOSC and SIESTA actions, all of them focused on delivering advanced and innovative services for EOSC.
