

Marialuisa Lavitrano

Professor, University Milano Bicocca / EOSC Association

Biography

Marialuisa Lavitrano is full professor of Pathology, director of Molecular Medicine Unit and of the Executive Masters' in Management of Research Infrastructures at Milano-Bicocca University where she was vice-Rector for International Affairs [2006-2013]. Over the years, she contributed to the international strategies of the Ministries of Research and of Health and coordinated the Italian participation in the BioMedical Sciences ESFRI roadmap. Prof. Lavitrano has a long-term experience in research, management, training and in bioethical aspects of science, with leading roles in 13 European funded projects within H2020 and Horizon programs. Prof. Lavitrano holds positions in executive and management roles (director BBMRI.it and member of BBMRI-ERIC Management Committee; of the eScience Advisory Committee, The Netherlands eScience Center; of the GÉANT eHealth Task Force Steering Committee; of the National task force on Open Science). In December 2020 she was elected and in 2023 she was confirmed on the board of eight directors of the EOSC Association and was appointed vice president.
