

Andy Götz

ESRF + EOSC-A

Biography

Andy started his scientific career as a radio astronomer at Rhodes University in Grahamstown (South Africa), followed by the Max Planck Institut für Radioastronomie in Bonn (Germany). He then moved to France where he joined the European Synchrotron (ESRF) in 1988 first working on the accelerators control systems, then moving on to beamline controls, data processing and data management. He leads the team implementing the ESRF data policy for scientific data and has been involved in EOSC since the beginning. In 2019 he became coordinator of the EOSC project PaNOSC for Open Science for Photons and Neutrons in Europe. Since June 2024 he works part-time for the EOSC Association as editor of the EOSC Handbook. He is passionate about Open Science, Open Source software, scientific data management, FAIR data and EOSC.
