

Thomas Geenen

Technology Partnership Lead for Destination Earth
European Centre for Medium-Range Weather Forecasts ECMWF

Biography

Thomas Geenen is the technology partnership lead for Destination earth at ECMWF, focusing on the integration of our evolving digital agenda in the European digital landscape. He brings over 20 years of experience in HPC and HPDA, both working in academia and industry. Before joining ECMWF at the beginning of 2022, he worked at ASML, leading the enablement teams for simulation and large-scale data-analytics as well as managing the globally distributed simulation platforms.

Thomas worked on digital twins at ASML in an industrial setting and now combines this with his academic background in solid earth system modelling to create digital twin(s) of the earth.
