Cavity substrate development

Wednesday 21 May 2025 11:00 (15 minutes)

The development of cavity substrate for FCC involves a combination of activities aiming at both providing optimal substrates for superconducting coating studies and establishing a strategy for an industry-ready production of the full cavity series required by the FCC SRF scheme. The presentation will provide an overview of the status of these activities, which are ongoing at CERN, Collaborations and Industry.

Author: GARLASCHE, Marco (CERN)

Co-authors: PEAugER, Franck (CERN); ROSAZ, Guillaume Jonathan (CERN); PARMA, Vittorio (CERN); VENTURINI DELSOLARO, Walter (CERN)

Presenter: GARLASCHE, Marco (CERN)

Session Classification: Superconducting Radio Frequency

Track Classification: FCC accelerators: SRF Programme
