

Empowering Underrepresented Communities Through Julia

Tuesday 1 October 2024 15:45 (15 minutes)

This presentation will explore the socio-economic impact of Julia. In light of the significant social inequalities in large cities like Karachi, mastering Julia opens up new opportunities for underrepresented communities. We will showcase how integrating Julia with CMS Open data sparks high school students' interest in STEM, and how we continue to nurture this enthusiasm through undergraduate projects as they advance in their academic careers.
