

1

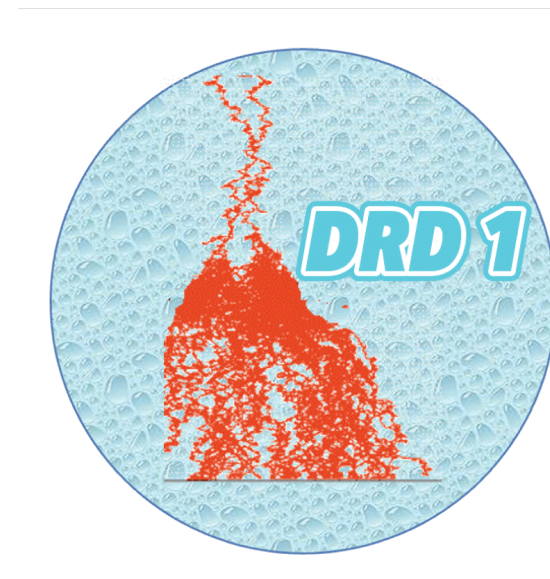

DRD1 Logo

2

Avalanche as the common term between technologies given the wide variety of detector designs in collaboration

3

Lines and images of technologies: solid (RPC), dashed (MPGD), dots (wires)

4

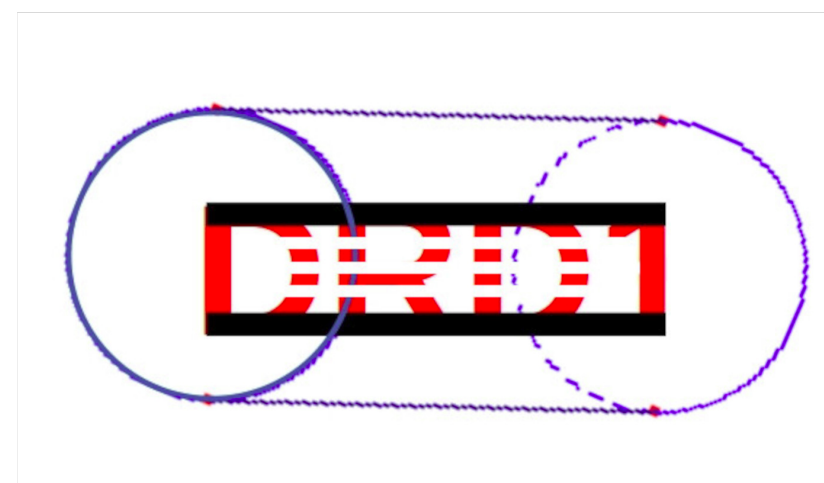

5

A cylinder to represent a TPC with the DRD1 text between 2 electrodes symbolising RPC or GEM. DRD1 letters not continuous to illustrate multigap RPC or mesh grid.

6

This simple logo uses the stylized depiction of a cluster generated by a passing particle on a segmented readout circuit as the backdrop for the letters DRD1, written in CERN blue.

7

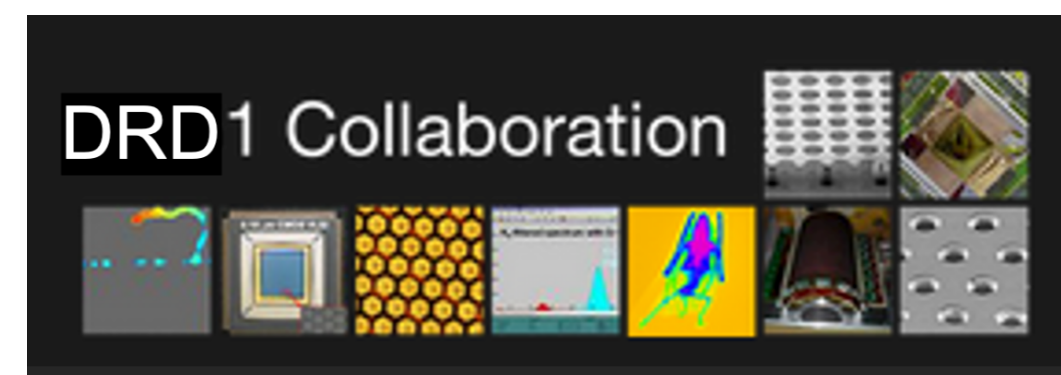

8

9

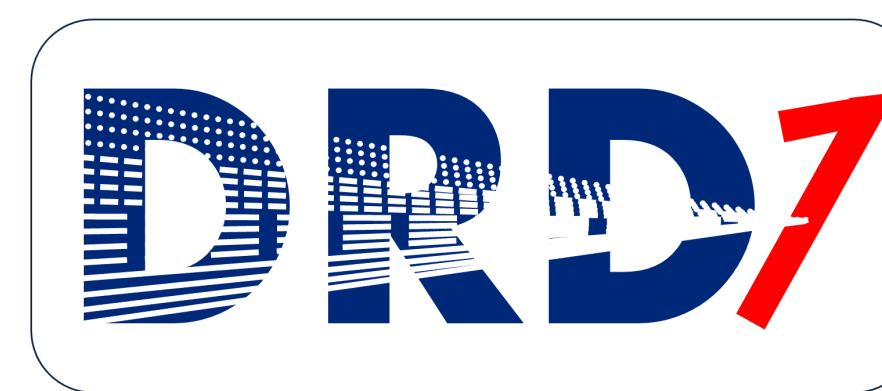

10

DRD text with different patterns (wire strip dots or RPC MPGD wires... whatever) and the 1 is an ionisation track with ionisation starting in the middle ...connected to the strips... ;-)

11
