Inside Nature

Our people*

Our people

288 highly qualified specialist staff work on the creation of *Nature* and the Nature-branded research journals' exceptional primary content every day.

 Our **201 professional Editors**, all PhD-trained and previously active researchers, are solely focused on the task of seeking out and curating the very best in science. Our editors are still immersed in the world of research, keeping abreast of the latest developments in their disciplines and engaging with researchers from institutions worldwide, while maintaining an impartial approach to all submissions.

38 Art, Production & Copy-editing staff make research as accessible, readable and engaging as possible.

 **3 Press Officers** work with authors and journalists to ensure exceptional work is communicated accurately to a wide global audience.

 **46 Editorial Assistants** support authors and reviewers through every stage of the publication process.

Inside Nature

The paper pipeline*

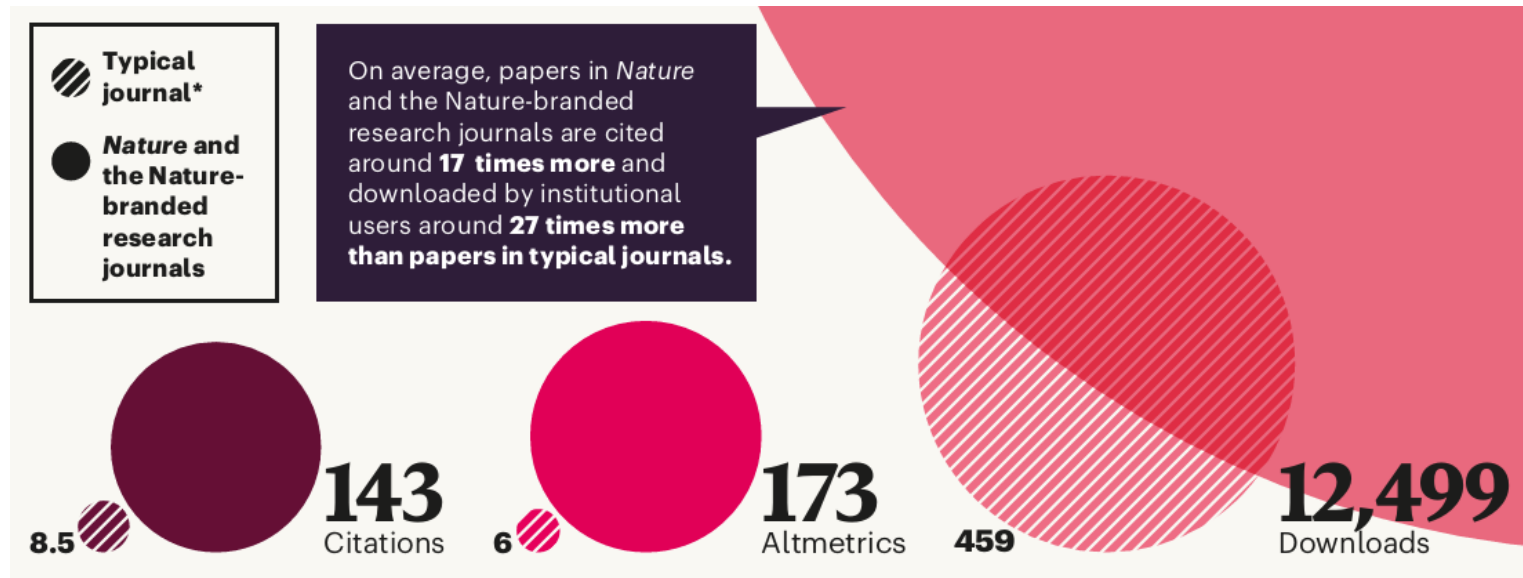

Our editors assess and select the most important research to publish, **working with authors and reviewers to deliver significant improvements to manuscripts**. These rigorous and labour-intensive review processes represent about half of our total investment in the journals.

Inside Nature

Audience & reach**

We help researchers gain the audience their most significant work deserves so that it is read, understood, and built upon.

Inside Nature

Making an impact*

Our publication platform nature.com and international press team **ensure researchers' best work gains the widest and most relevant audience**

Research that is news

In 2021 our dedicated international press team worked to support the publication of over **100,000 news stories**, supporting authors in reaching researchers, policymakers and the general public with accurately and clearly reported news.

Research that gets talked about

Articles published in *Nature* and the Nature-branded research journals in the past year received:

9,655,511

Twitter mentions

194,707

Facebook mentions

Research that influences and innovates

Articles published in *Nature* and the Nature-branded research journals received **16,479 mentions in policy documents and 390,238 patents** in the past year.

Thank you
