ICRU schedule for RC36

Start with Chapter 2

Presenter: OTTO, Thomas (CERN)

Contribution ID: 2

Type: **not specified**

Afternoon session 2

Tuesday 5 November 2024 15:30 (2 hours)

Chapter 2

Chapter 7

Presenter: OTTO, Thomas (CERN)

Contribution ID: 3

Type: **not specified**

Morning session 1

Wednesday 6 November 2024 08:30 (1h 45m)

Chapter 3

Presenter: OTTO, Thomas (CERN)

Contribution ID: 4

Type: **not specified**

Morning session 2

Wednesday 6 November 2024 10:45 (1h 45m)

Chapter 3

Chapter 4

Presenter: OTTO, Thomas (CERN)

Contribution ID: 5

Type: **not specified**

Afternoon session 1

Wednesday 6 November 2024 13:45 (1h 45m)

Chapter 4

Chapter 5

Presenter: OTTO, Thomas (CERN)

Contribution ID: 6

Type: **not specified**

Afternoon session 2

Wednesday 6 November 2024 16:00 (1h 45m)

Chapter 5

Chapter 6

Presenter: OTTO, Thomas (CERN)

Contribution ID: 7

Type: **not specified**

Morning session 1

Thursday 7 November 2024 08:30 (2 hours)

Chapter 6

Chapter 8 (Author needed)

Any left-overs

Presenter: OTTO, Thomas (CERN)

Contribution ID: 8

Type: **not specified**

Morning session 2

Thursday 7 November 2024 11:00 (2 hours)

Chapter 1 (Author needed)

How to go from here ?

Zoom -meetings dates

Contribution ID: 9

Type: **not specified**

Wrap-up

Presenter: OTTO, Thomas (CERN)

Contribution ID: **10**

Type: **not specified**

Heading to Town for Dinner (Tram)

Wednesday 6 November 2024 19:00 (3 hours)

Proposal:

Swiss Fondue in the historic restaurant “Les Armures” in the old town of Geneva. Non-cheese dishes are also on the menu.

Contribution ID: 11

Type: **not specified**

Going to Meyrin for Dinner (Walk or Tram)

Tuesday 5 November 2024 19:00 (3 hours)

Proposal:

“Restaurant la Place”, a Pizzeria-Restaurant run by real Neapolitans, with a choice of Pizza, Pasta, and other Italian dishes.

Contribution ID: 12

Type: **not specified**

Facility visit (optional)

Thursday 7 November 2024 14:15 (1h 30m)

Two options:

- see the Proton synchrotron halls (interesting, nearly 70-year old technical architecture) and the second-smallest synchrotron at CERN, the Low-energy ion ring.
- or see the new underground facilities of High-Luminosity LHC, but unfortunately no accelerator (the LHC is running and therefore inaccessible).
