

Status of NA64e run @H4

SPS&PS users meeting 30.05.2024

Laura Molina Bueno
laura.molina.bueno@cern.ch

Many thanks to the BE-EA group, in particular Sylvain, Nikos and Michael

Summary of the week

- We continue data taking since last week and we collected 3.3×10^{11} EOT with an average intensity of 6.5×10^6 e-/spill. There were problems during the weekend with the beam but overall good beam quality and periods with 2-3 spills.
