

# Spåtind Bells

Melody: Jingle Bells

6<sup>th</sup> of Jan. 2025

Back in Skeikampen

Spåtind has no end

50 years from now

We are still around

FCC might come

If CEPC won't

I guess we will just wait and see

But meanwhile I will ski

*Chorus:*

Colliders, Neutron stars

Those labs are pretty far

BSM is hard to find

So ideas should fly

EFT, QCD

Any theory

You just tell me where to look

The plots will have you shook

MC I will use

I know it's not a ruse

Partons showering

Color modeling

The snow is looking good

And so is all the food

Coffee breaks I need some more

Or you will make me snore

*Chorus ('86):*

Superstring - superstring

You're the latest hit

will you make us understand

our worldly sheet ?

Nucleus - nucleus

When you do collide

Will you show whats inside you

or take us for a ride ?

Lead-lead, p-p, e-e,

Downhill, uphill ski ski

Muons, taus or tops

The skiing doesn't stop

QGP is neat,

There is so much heat

And with a multi-messenger

I'm beyond any  $E$

*Chorus ('96):*

Top was found, top was found

What a MEGA - hit!

Finding it exactly THERE

Worries me a bit!

*Final Chorus:*

Conference, conference

Physics without pain

Spåtind has been here again

Back in Skeikampen

*Slowing down:*

Spåtind has been here again

Back in Skeikampen
