

## IPPOG Collaboration Author List 2024

The International Particle Physics Outreach Group is a network of scientists, science educators and communication specialists created in 1997 to demonstrate the need and importance of outreach in science in general and High Energy Particle Physics in particular. Collaboration members are grouped into an informal discussion body called the IPPOG forum, and are offered the possibility to become IPPOG authors. The present list will be updated once per year, to reflect the collaboration evolution.

IPPOG members act as contacts and representatives of a world wide community: **we therefore gratefully acknowledge the invaluable contribution, skills and dedication of the colleagues, students and volunteers without whom particle physics outreach would not exist.**
