The Big Questions

What have we done?

What topics do we want to continue pursuing?

What is left to do (according to the funder, not necessarily according to us in LHC experiments)?

Funding possibilities

- MSCA Horizon 2020 schemes.
 - Another **doctoral network/industrial doctoral network** <https://marie-sklodowska-curie-actions.ec.europa.eu/actions/doctoral-networks>
 - **Staff exchanges** <https://marie-sklodowska-curie-actions.ec.europa.eu/actions/staff-exchanges/6-steps-to-prepare-your-application>
 - **COFUND** <https://marie-sklodowska-curie-actions.ec.europa.eu/actions/cofund/6-steps-to-prepare-your-application>
(here we need a significant financial buy-in from the partners and the university but it's probably the scheme that gives the most research/resources back)
- **Synergy** grant for PIs. <https://erc.europa.eu/apply-grant/synergy-grant>
Note: recipients of individual ERC grants can't apply during their grant period
- **COST actions** <https://www.cost.eu/>
- Country-specific grants / international partnerships?
 - Lots of schemes involving industry in the UK...but usually national industries privileged
