Recovery of DELPHI and OPAL event displays: the PHIGS story

Wednesday 2 October 2024 15:30 (10 minutes)

The event displays of DELPHI and OPAL were built on top of a commercial and closed source PHIGS implementation. When the company providing the toolkit ceased to exist, and the existing binaries stopped working on recent operating systems, these tools were essentially given up.

In this presentation, we will show how we managed to revive the event displays nevertheless, based on an open source prototype implementation called OpenPHIGS, which was published a couple of years ago.

Summary

Author: Dr SCHWICKERATH, Ulrich (CERN)

Co-author: SCHROEDER, Matthias

Presenter: Dr SCHWICKERATH, Ulrich (CERN)

Session Classification: Experiments and sites
