Data preservation in the H1 experiment

Wednesday 2 October 2024 16:20 (20 minutes)

The H1 experiment at HERA was taking data from 1992 to 2007. A long-term data preservation system was set up in 2015 at DESY, Hamburg. The system permits the analysis of H1 data on the National Analysis Facility NAF at DESY. This talk summarizes the H1 data analysis model, recent physics results, and recent developments related to data preservation.
