

PS Report week 28

Many thanks
to the PS OP and coordination teams as well as all equipment experts and support teams!

Beam availability

Main points

- Small beam interruptions from L4
- Position drift of the beam at extraction is still being investigated
- Gill in contact with Federico and Giuseppe to try and reduce losses on EAST cycles and improve efficiency
- MD on Wednesday on the effect of primary beam bunch length

W28 supervisor : Y. Dutheil
W29 supervisor : B. Mikulec

Questions and Comments ?

09:30 ON MONDAY: PS-MPC
