

Second DRD3 week

Introduction to the WG2 session

Anna Macchiolo (UZH)

Alessandro Tricoli (BNL)

Martin van Beuzekom (Nikhef)

Project proposals and MoU preparation

DRD3

- 12 project proposals received so far on hybrid timing sensors → see discussion session at the end of today meeting
 - Additional projects are welcome
- Three projects included so far in the draft of the MoU Annex7
 - Development of TI-LGADs
 - US-Japan Development of Ultra Fast-Time Low Mass Tracking Detectors
 - Novel silicon 3-D trench pixel detectors on 8 inch CMOS process
- Still in discussion if CERN will accept WP in the MoU with intentions and without pledges → probably we will hear more in the DRD3 CB this week

WG2 Web Page and Mattermost channel

DRD3

WG 2 - Hybrid Silicon Technologies

This group studies sensors with 4D capabilities for various applications including Time-of-Flight systems with only 1-2 layers of sensors with the best possible timing resolution and large 4D trackers with many layers.

Conveners:

- Alessandro Tricoli (alessandro.tricoli@cern.ch)
- Anna Macchiolo (Anna.Macchiolo@cern.ch)
- Martin van Beuzekom (martinb@nikhef.nl)

WG2 Convenors contact email: drd3-wg2-convenors@cern.ch

Documents

- Summary of Expressions of Interests: [EoIs Summary](#)
- List of submitted EoIs: [EoIs](#)

Activities

- [Test-beam and Characterisation Facilities \(liaison to WG5\)](#)
- [Irradiation Campaigns \(liaison to WG3\)](#)
- [Interconnections \(liaison to WG7\)](#)
- [Readout Systems \(liaison to DRD7\)](#)
- [Simulation \(liaison to WG4\)](#)

Useful Links and Tools

- WG2 meetings: [indico](#)
- WG2 e-group (self subscription with admin approval): drd3-wg2-hybrid@cern.ch
- WG2 Mattermost channel: <https://mattermost.web.cern.ch/drd3/channels/wg2-general>

- [WG2 Web Page](#) linked from the [DRD3 general web page](#)
- Dedicated pages for activities relevant to the WG2 with e-mail of liaison persons:
 - [Test-beam and Characterisation Facilities \(liaison to WG5\)](#)
 - [Irradiation Campaigns \(liaison to WG3\)](#)
 - [Interconnections \(liaison to WG7\)](#)
 - [Readout Systems \(liaison to DRD7\)](#)
 - [Simulation \(liaison to WG4\)](#)
- Join our [Mattermost channel](#)
→ help us to make this a useful communication channel

Liaisons to other WG

DRD3

- Test-beam and Characterisation Facilities (liaison to WG5)
 - Jordi Duarte-Campderros (IFCA, Santander)
 - Ryan Heller (LBL)
- Irradiation Campaigns (liaison to WG3)
 - Leena Diehl (CERN)
 - Simone Mazza (UCSC)
 - Xuan Li (Los Alamos)
- Interconnections (liaison to WG7)
 - Mathieu Benoit (ORNL)
- Readout Systems (liaison to DRD7)
 - Abderrahmane Ghimouz (PSI)
 - Manwen Liu (IMECAS)
- Simulation (liaison to WG4)
 - Jörn Schwandt (Uni Hamburg)

Test-beams:

- Start to collect interests for TB campaigns in 2025
 - Organization and requests from WG2 at the different facilities (CERN SPS, DESY, Fermilab +??)
 - DRD3 TB request at SPS for WG2 structures submitted within the activities of WG5

Upcoming TB calls

Activity	Facility	Important dates	Comments
Call for test beam time	DESY	Deadline: November 9th 2024	Beam time for period Q1-2025 to July-2025
TCT-TPA technique school	CERN	Tentative: Feb. 04-06 2025	To be announced by WG5

Contacts:

- Ryan Heller (rheller@lbl.gov)
- Jordi Duarte (jorge.duarte.campderros@cern.ch)

List of TB facilities

Test Beam Facilities at Europe

Facility	Particle type	Particle Energy	Beam spot size	Country
CERN SPS North Area (H2)	electrons, protons, pions, muons, ions	10-400 GeV/c	mm to cm	Switzerland
CERN SPS North Area (H4)	electrons, pions, muons, ions	10-400 GeV/c	mm to cm	Switzerland
CERN SPS North Area (H8)	protons, electrons, pions, muons, ions	10-400 GeV/c	mm to cm	Switzerland
CERN SPS North Area (H16)	electrons, pions, muons	10-120 GeV/c	mm to cm	Switzerland
CERN PS East Area (T10)	hadrons, muons	up to 10 GeV/c	few cm	Switzerland
CERN PS East Area (T9)	electrons, hadrons, muons	0.5-10 GeV/c	few cm	Switzerland
DESY II Test beam facility	electrons, positrons	1-6 GeV/c	few mm	Germany
MAMI (Mainz)	electrons	0.18-1.5 GeV/c	1-2 mm	Germany
Univ. Bonn ELSA	electron	1.2-3.2 GeV/c	mm	Germany
INFN Frascati BTF	electrons, positrons	25-700 MeV/c	mm to cm	Italy
PSI High Intensity	protons, pions	590 MeV/c	few mm	Switzerland
PSI μE4	muons	10-50 MeV/c	few cm	Switzerland
PSI πM1	pions, muons, electrons	100-500 MeV/c	1-2 cm	Switzerland
RAL ISIS	protons	800 MeV/c	cm	UK
COSY (Jülich)	protons, deuterons	0.3-3.7 GeV/c	few mm	Germany
PROTO (Birmingham)	protons	up to 40 MeV/c	1-10 mm	UK

Liaisons to other WG

- Test-beam and Characterisation Facilities (liaison to WG5)

- Jordi Duarte-Campderros (IFCA, Santander)
- Ryan Heller (LBL)

- Irradiation Campaigns (liaison to WG3)

- Leena Diehl (CERN)
- Simone Mazza (UCSC)
- Xuan Li (Los Alamos)

- Interconnections (liaison to WG7)

- Mathieu Benoit (ORNL)

- Readout Systems (liaison to DRD7)

- Abderrahmane Ghimouz (PSI)
- Manwen Liu (IMECAS)

- Simulation (liaison to WG4)

- Jörn Schwandt (Uni Hamburg)

Interconnections:

- Collect info on hybridization vendors with experience with HEP pixelated devices or methods (ACF-like) with fast turn-around time and low cost for R&D → **strong link to WG7**

WG2 - Interconnections

Our collaboration combine a large amount of knowledge and capabilities on achieving complex interconnect for hybrid detectors.

- Bump-bonding technology for pixel detectors
- Wire-bonding for ASIC interconnect to services
- Connectors and PPO type interface for pixel detector modules
- Emerging interconnect methodologies and R&D tools

Providers of these interconnect technologies are sometime industrial, sometime in the community , sometime in between. Important question often arise :

- What are the typical cost associated to it?
- What are the technological steps, is is compatible with my project?
- Who are the people to contact, what is the procedure?
- Is there collaboration opportunities with the industry ?
- What are the important procedures, how do I do this in my lab ?

This webpage intend to gather the important information to get started with interconnects for hybrid detectors and get into contact with the relevant experts able to provide solutions for your project from R&D up to production.

Contacts:

- Mathieu Benoit (benoitm@ornl.gov)

Liaisons to other WG

- Test-beam and Characterisation Facilities (liaison to WG5)

- Jordi Duarte-Campderros (IFCA, Santander)
- Ryan Heller (LBL)

- Irradiation Campaigns (liaison to WG3)

- Leena Diehl (CERN)
- Simone Mazza (UCSC)
- Xuan Li (Los Alamos)

- Interconnections (liaison to WG7)

- Mathieu Benoit (ORNL)

- Readout Systems (liaison to DRD7)

- Abderrahmane Ghimouz (PSI)
- Manwen Liu (IMECAS)

- Simulation (liaison to WG4)

- Jörn Schwandt (Uni Hamburg)

Read-out systems:

- Are there read-out boards available already responding to our specifications and needs?
- Should we aim to a common design for WG2?
- Collect requirements for timing read-out chips under-development, interface with DRD7
- Advise about sensors floorplan to be compatible with chips being developed at the moment, or already available

The agenda today

DRD3

	Coffee Break & Registration	
	500/1-001 - Main Auditorium, CERN	09:30 - 10:00
10:00	Welcome: Welcome	<i>Gregor Kramberger, Michael Moll</i>
	500/1-001 - Main Auditorium, CERN	10:00 - 10:20
	Introduction	<i>Alessandro Tricoli et al.</i>
	500/1-001 - Main Auditorium, CERN	10:20 - 10:35
	Controlled charge multiplication in thin small-pitch 3D pixel sensors	<i>Andrew Donald Gentry</i>
	500/1-001 - Main Auditorium, CERN	10:35 - 10:55
11:00	Preliminary results on 3D silicon sensors using femtosecond TCT-SPA and TPA-TCT techniques at ELI: Work in Progress	<i>Gordana Lastovicka Medin</i>
	On the properties of signal formation in LGAD sensors	<i>Nicolo Cartiglia</i>
	500/1-001 - Main Auditorium, CERN	11:15 - 11:35
	Ghosty Ti-LGAD	<i>Ms Danijela Mrkic</i>
	500/1-001 - Main Auditorium, CERN	11:35 - 11:55
12:00	study of deep carbonated LGAD at IHEP	<i>Yuan Feng</i>
	500/1-001 - Main Auditorium, CERN	11:55 - 12:15
	First Irradiation Studies of the novel nLGAD Concept	<i>Veronika Kraus</i>
	500/1-001 - Main Auditorium, CERN	12:15 - 12:35

14:00	Performance of AC-LGADs in radiation hard environment and non-standard charge deposition	<i>Dr Simone Michele Mazza</i>	13:55 - 14:15
	500/1-001 - Main Auditorium, CERN		
	Impact of high deposited energy on Single Event Burnout in LGAD sensors	<i>Dr Matthew Glenn Kurth</i>	14:15 - 14:35
	500/1-001 - Main Auditorium, CERN		
	Research of AC-LGAD strip detector for 4D tracking	<i>Weiyi Sun</i>	14:35 - 14:55
	500/1-001 - Main Auditorium, CERN		
15:00	Update on the DC-coupled Resistive Silicon Detector for 4D tracking	<i>Roberta Arcidiacono</i>	14:55 - 15:15
	500/1-001 - Main Auditorium, CERN		
	Characterization of Low Gain Avalanche Detector Gain by Means of the Transient Current Technique	<i>Mohamed Hijas Mohamed Farook</i>	
	Coffee Break		
	500/1-001 - Main Auditorium, CERN		15:35 - 16:05
16:00	RD50 Common Fund Project - RD50-2023-03: Deep Junction LGAD	<i>Dr Simone Michele Mazza</i>	16:05 - 16:20
	500/1-001 - Main Auditorium, CERN		
	ASIC Development for Timing Measurements using LGAD Sensors	<i>Abderrahmane Ghimouz</i>	16:20 - 16:35
	500/1-001 - Main Auditorium, CERN		
	NEUROPIX: A neuromorphic computing framework for pixelated detector data processing	<i>Mathieu Benoit</i>	16:35 - 16:50
	500/1-001 - Main Auditorium, CERN		
17:00	OPTIMA, a board dedicated to Optimized Precision Timing for Multichannel Acquisition	<i>Federico De Benedetti</i>	16:50 - 17:05
	500/1-001 - Main Auditorium, CERN		
	LGAD and 3D technology at the IMB-CNM	<i>Neil Moffat</i>	17:05 - 17:20
	500/1-001 - Main Auditorium, CERN		
	Summary of Proposed Projects in WG2	<i>Alessandro Tricoli et al.</i>	17:20 - 17:25
	500/1-001 - Main Auditorium, CERN		
	WG2 - Discussion	<i>Alessandro Tricoli et al.</i>	
	500/1-001 - Main Auditorium, CERN		17:25 - 17:55
