CMS GEMs are changing gear

Archana Sharma (CERN) 9th Dec 2020

GEM Technology – Physical Explanation

GEM Technology

GEM Foil during assembly

GEM Foil Under Microscope

Measuring impedance

- Deformation In the foil itself
- Any sharp edge
- Dust in the hole.

GEM Technology – Assembly

Clean Room

GEM Assembly

GEM Technology – Quality Control Tests

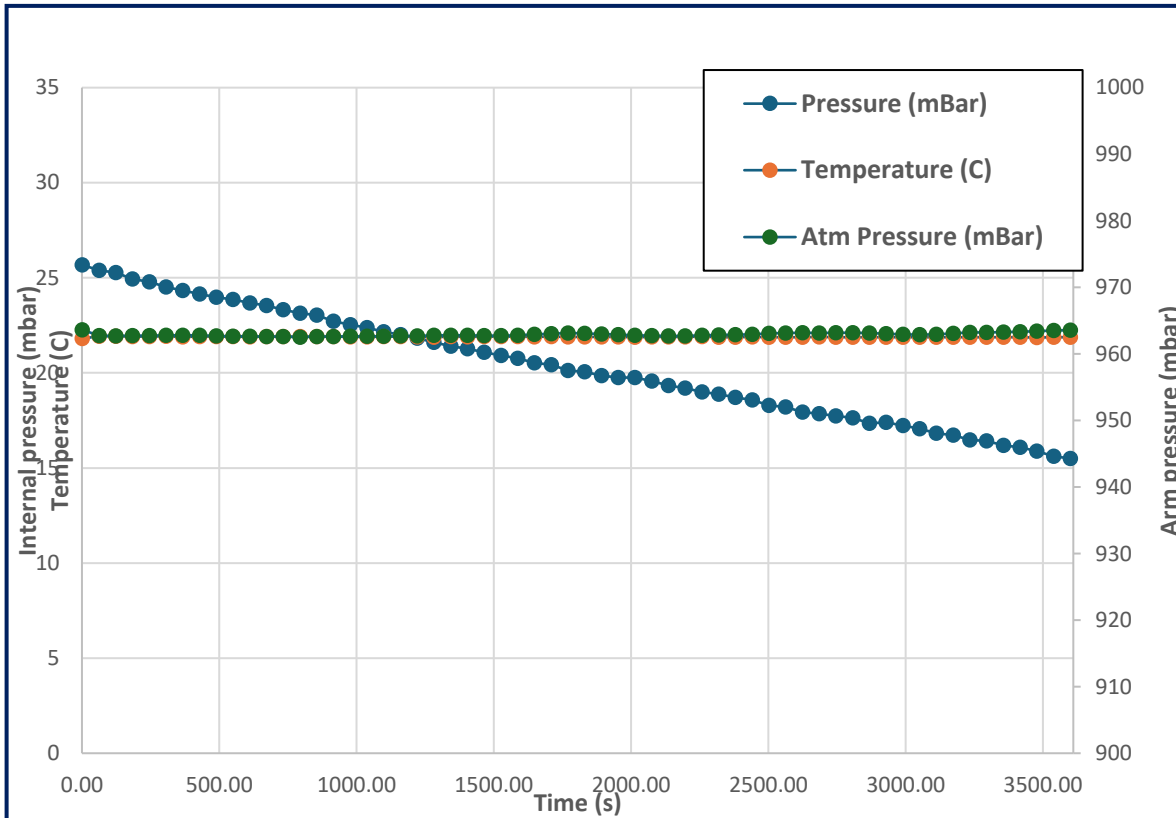

QC3 & QC4 Area / Preveessin B904

- QC1: Inspecting the material.
- QC2: HV Test (To check current leak)
- QC3: Gas Leakage test.
- QC4: Intrinsic noise & Voltage/Current Linearity test.
- QC5: Gain and Uniformity test.
- QC6: HV stability test for all chambers.
- QC7: Electronics connectivity test.
- QC8: Cosmic Test of the chambers

GEM Technology – Data analysis QC3

QC3 – test Failed

QC3 – test Passed

My Contribution to CMS phase-II upgrade with GEM detector

I have a great fun being here at CERN, the European organization for nuclear research. And it's been fascinating to contribute and being part of the summer program this year. And looking forward to coming back here in the near future.
