Settings management –status and plans (15'+10')

Wednesday 11 December 2024 16:45 (25 minutes)

2024 report: settings-related issues and improvements

Future plans: what will be done in 2025 and beyond, with resource requests

Settings management in the automation context: online checks for all machines, avoiding trim conflicts (human <-> controller, controller <-> controller)

(Replacement of CESAR)

Presenter: HOSTETTLER, Michi (CERN)

Session Classification: Controls, data and automation <-> Operation
