Modern Application Development & Deployment (part 2 of 2)

Tuesday 5 November 2024 10:00 (1 hour)

"I need to develop an application X for user community Y, which will need to be run and maintained over time"

1. Application development a. This part of the session will explore the multiple types of applications, how to leverage version control system Gitlab and it's CI to have modern application deployment. This is organized as a workshop and will include a hands-on experience covering the best practices to develop containerized applications and strategies for deploying them.

Presenter: BORGES AURINDO BARROS, Francisco (CERN)
