

# Beyond Numbers: Mastering Data Interpretation and Visualization with Power BI

*Friday 9 May 2025 11:30 (1 hour)*

Say goodbye to dull spreadsheets and obsolete Excel charts!

Explore how data transcends mere numerical figures, evolving into a rich tapestry of insights and narratives. We delve into the significance of interpretation, understanding the context, and crafting compelling visual stories that drive informed decision-making.

Discover the depth of data visualization techniques, from interactive dashboards to predictive analytics, all within the intuitive framework of Power BI.
