

Keeping track only of real progress

Problem

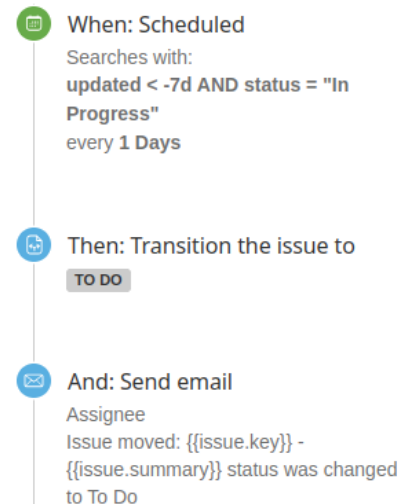

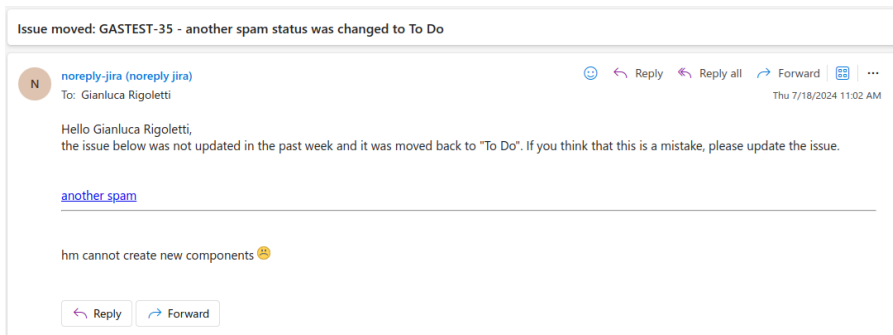

Too many tickets “In Progress” → difficult to track the work of the past week

Goal

Only the tickets where one has physically worked in the past week “In Progress”

Proposed solution

- If the ticket is not updated for > 7 days, the system automatically change status: “In Progress” → “To Do”. Assignee will receive an email notification
- If the work on the ticket is paused → Assignee should put the status “On Hold”

On Hold demo

Currently → active on GATEST project

From 18/07 → active on GASSYSTEMS project

Jira: TS2 and 3D drawings

- Added new version for TS2

The screenshot shows the 'Create Issue' form in Jira. The 'Fix Version/s' field is highlighted with a red box, and the option 'RUN3-2024-TS2' is selected. Other fields include 'Description', 'Components/s', 'Assignee' (set to 'Automatic'), and 'eLog URL'.

- Added new components for 3D drawings:
“**Drawings**” → P&ID and 3D drawings tickets
“**Common**” → ticket related to common activities (e.g. pressure sensors)

The screenshot shows the 'Create Issue' form in Jira. The 'Components/s' field is highlighted with a red box, and the options 'Drawings' and 'Common' are selected. Other fields include 'Attachment', 'Description', 'Assignee' (set to 'Automatic'), and 'Fix Version/s'.
