

Hybrid Pixel Single Photon Detector for Quantum Applications

Friday 24 January 2025 15:55 (30 minutes)

In this presentation, I will provide an overview of our technological advancements and current projects within the quantum field using TPx3/TPX4. Additionally, I will discuss the obstacles we are encountering in the development of quantum technologies, highlight current gaps in the field, and outline the ideal specifications required for future breakthroughs.

Presenter: FAROOQ, Shazia (Amsterdam Scientific Instruments)
