

STATUS REPORT TO THE R-ECFA VISIT TO THE UK

UK

Kate Shaw University of Sussex

Physics Education and Outreach in the

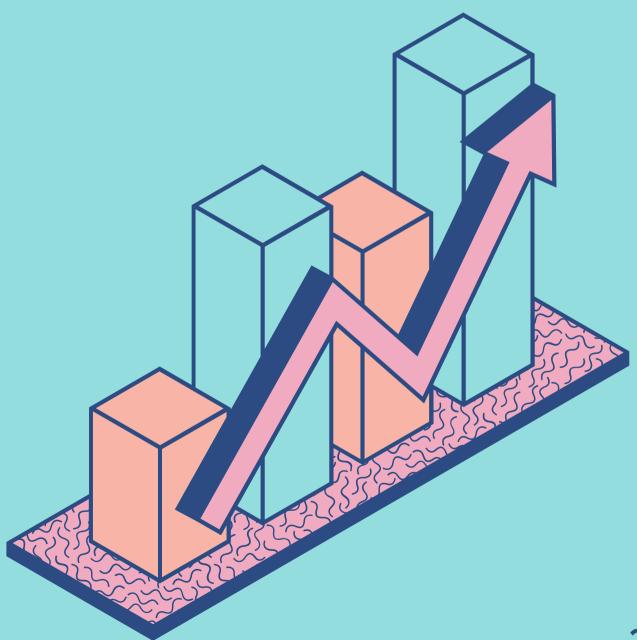

Physics Education and Training

Too few young people are choosing physics-related education and training beyond the age of 16, to fuel future innovation

Employers are **struggling to find people** with the requisite skills among the current workforce, forcing them to **scale back planned R&D**.

There is a lack of diversity among those studying and working with physics, limiting opportunity and innovation outcomes.

IOP Report [1] <u>Physics: investing in our future</u> "Physics knowledge and skills are powerful drivers of productivity and innovation and open doors to a range of rewarding careers across the entire economy."

Barriers to unlocking potential

WHAT ARE THE MOST SIGNIFICANT BARRIERS PREVENTING THE UK FROM DEVELOPING THE WORKFORCE NEEDED FOR PHYSICS R&D TO THRIVE?

1. Teaching workforce challenges

There are serious shortages of teachers with a physics background in secondary and further education.

IOP Report [1] <u>Physics: investing in our future</u> 2. Lack of diversity and inclusive culture

Women, people from disadvantaged backgrounds, disabled people, those who identify as LGBT+, and minority ethnic groups are all underrepresented. "Increasing R&D investment to 2.4% of GDP by 2027 would generate an additional 80,000 jobs and £30.5bn in GDP¹."

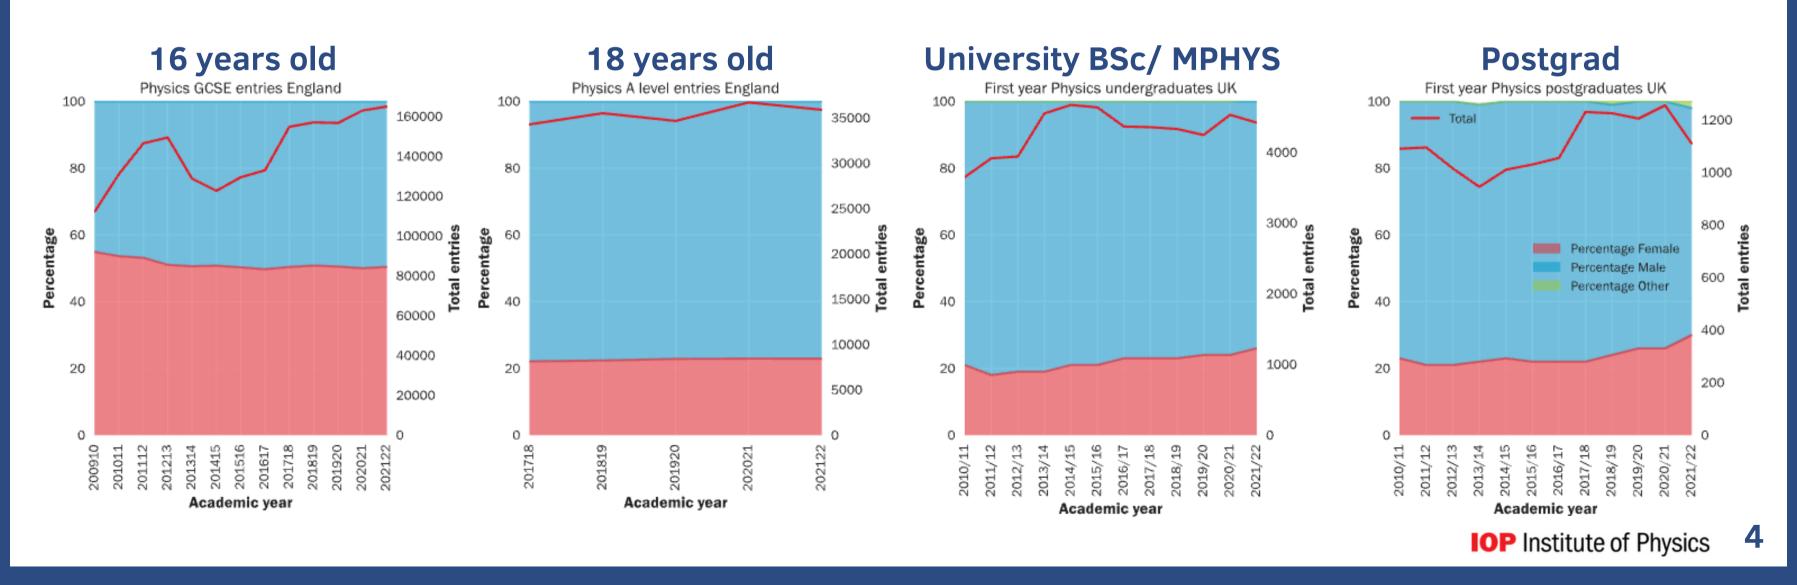

3. Inflexible research careers & interaction with industry

Research career structures are
narrow with few incentives for
industrial engagement, preventing
people from moving easily between
academia and industry.

Physics Education in Schools & Universities

PHYSICS STUDENT NUMBERS

Physics Student numbers have been on the up (until 2021/22): Gender balance has been improving at UK universities, but less in schools.

Sources: Department for Education (DfE), HESA/JISC

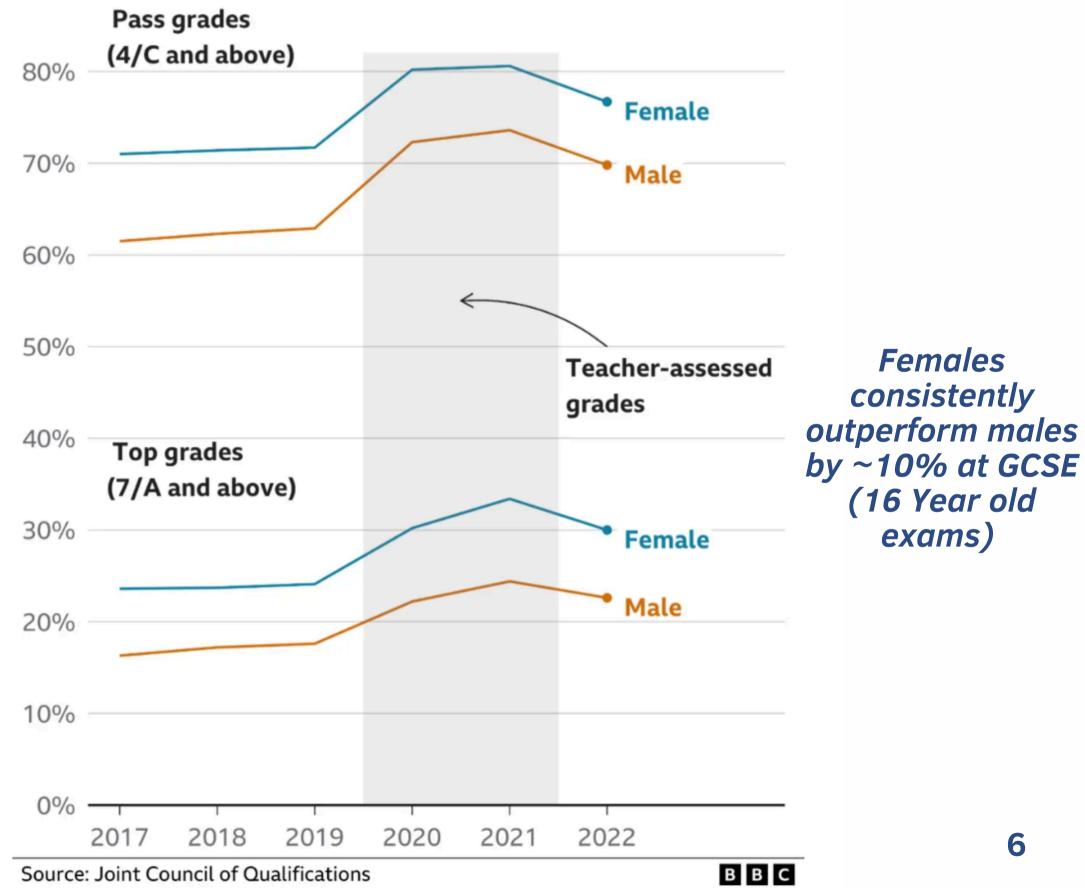

EDI ISSUES in UK PHSYICS Gender Ethnicity Region / Economic Background

Girls consistently outperform boys at GCSEs

Percentage of pass and top grades across all subjects by gender

Gender & Participation: The Pipeline

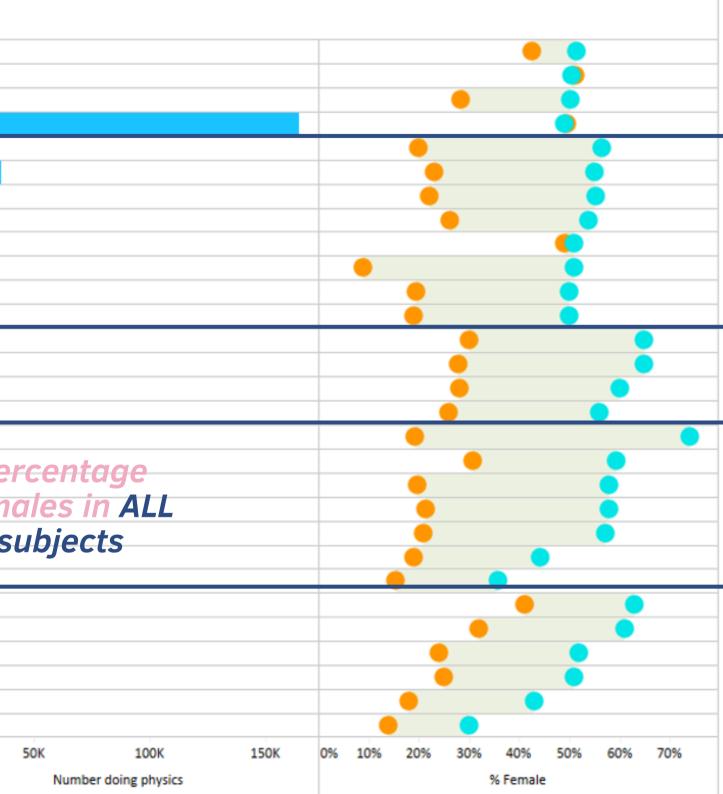

Physics has an even gender split at GCSE in England & Wales. It's then very male-dominated at further education- slightly less so in higher education.

				All Subjects %	
Broad Category	Category	Number doing physics	Physics % Female	Female	
Secondary Education	GCSE (Northern Ireland 2022/23)	2,759	42%	51%	
16 years old	GCSE (Wales, aged 15- 2021/22)	8,159	51%	50%	
	National 5 (Scotland, 2022/2023)	13,235	28%	50%	
	GCSE (england- 2021/22)	164,948	50%	49%	
Further Education	A Levels in Wales	1,326	20%	56%	
	A Levels in England (2021/22)	35,894	23%	55%	
	Scottish Advanced Highers (2022/23)	2,085	22%	55%	
	Scottish Highers (2022/23) ~23%	7,995	26%	54%	
	Science T-Levels	152	49%	51%	
	Engineering T-Levels	1,632	9%	51%	
	English Apprenticeships (any connection to physics)	29,360	19%	50%	
	English Apprenticeships (strong connection to physics)	210	19%	50%	
Higher Education (Students)	First Year Postgrad Degrees (English Domiciled)	2,120	30%	65%	
	First Year of Postgrad Degrees (Scottish Domiciled)	125	28%	65%	
University	First Year of Undergrad Degrees (Scottish Domiciled)	425	28%	60%	
BSc/ MPHYS	First Year of Undergrad Degrees (English Domiciled)	5,195	26%	56%	
Graduates (in work in GB in 2021)	Graduates working in Education (graduating 5 years before 2021)	235.62	19%	74%	
	Graduates in industry, graduating 1 year before 2021	1,340	31%	59%	Per
	Graduates graduating 3 years before 2021	1,720	20%	58%	
	Graduates graduating 5 years before 2021	1,870	21%	58%	Femo

Funding & Support

Science and Technology Facilities Council (STFC) Funding for Public Engagement:

- Public Engagement Spark Awards
- Public engagement Nucleus awards
- Leadership fellowships in public engagement

The Wonder Initiative focuses on working with participants from the 40% most socioeconomically deprived areas of the UK, in particular eight to 14year-olds and their families and carers The Institute Of Physics (IOP) Limit Less campaign supports young people to change the world and fulfil their potential by doing physics

Apply for £500 - £4,000 Three rounds a year!

UK Research and Innovation TOMORROW

Conference for Undergraduate Women and Non-Binary Physicists UK and Ireland (CUWiP+)

- improving knowledge of physics and astronomy
- focusing on development as a scientist
- meeting inspirational women and those who identify as non-binary in physics
- connecting, building connections and sharing experiences with other physics students
- increasing confidence to apply for postgraduate studies or starting a career in physics

The goal of the conference is to encourage undergraduates to remain in the physics field by:

Outreach Roles at CERN

ATLAS & LHCB OUTREACH CO-COORDINATORS

Darren Price, 2022-2024 **University of Manchester**

Harry Cliff, 2019-2022 **University of Cambridge**

Clara Nellist, 2019-2021 **University of Amsterdam** and Nikhef

Mark Williams, 2021-2023 **University of Edinburgh**

Kate Shaw, 2014 - 2019 **ICTP & the University of** Sussex

Gediminas Sarpis, 2023-20225 **University of Edinburgh**

International Particle **Physics Outreach Group**

UK is member of the **International Particle Physics Outreach Group (IPPOG)** Collaboration

Particle Physics Masterclasses

ORGANSIED BY IPPOG ANNUALLY

Each year 100's organised around the world

Around 20 UK universities take part, inviting local school students to spend a day being a particle physicist!

Every day at 4pm is the video coneference, moderated by CERN scientists

Helps students get a feel for research

Students get to analyse real data! And get to visit a local university for the day.

Many PhD students and postdocs at CERN take part

OUTLOOK **Strengths**

Weaknesses

- UK Physics public engagement and outreach is one of the **best in the world**, however further investment is needed
- Plenty of research into problems of inclusion and diversity in physics, fantastic publications that benefit the international committee too
- Good **community of scientists** working in public engagement, in the UK and at CERN

- society needed

• UK still has a lack of physics graduates, lack of physics teachers, poor career pathways, limited funding for initiatives or long term strategies

• Issues in EDI are systemic, change is happening but very slowly, bigger effort from government and

• Universities could work together more, and insist to focus on under privileged students and regions

Thank you!

Our UK community is very proud of the UK physics education and outreach agenda, however many issues remain that must be addressed.

THANKS TO IOP AND STFC FOR INPUT TO THIS TALK
