

Fifthe meeting of the Nufact Scientific program committee

Indico page <https://indico.cern.ch/conferenceDisplay.py?confId=143595>

Present Jim Strait, Marcos Dracos, Harold Kirk, Maury Goodman, Elena Wildner, Vittorio Palladino, Alain Blondel, Ilias Efthymiopoulos, Alex Bogasz, Mike Zisman, and someone else I forgot.

Plenary talks

Day 1

all complete

Day 2

talk on long baseline options at CERN is in negotiation within Laguna-LBNO

Day 3

talk on reactor neutrino experiments will be Zelimir Djurcic from Argonne (zdjurcic@hep.anl.gov) but confirmation from Hervé de Kerret is needed

Talk on short baseline proposal at CERN will be someone from double-Larg still pending.

Day 4

talk on accelerator R&D experiments (c/o Ilias – Rob Edgecock) is pending

Talk on Nufact design will be decided at IDS meeting this week

Talk on flux control and near detector will be given by Tsenov or someone nominated – there will be a workshop on this subject the week-end preceding Nufact

Day 5

talk on “Neutrino physics within and beyond the 3 flavor oscillation” is pending – suggestions to cover for Belen Gavela are welcome

Talk on Muon collider is pending Shiltsev has been approached.

In red the talks that are potentially uncovered at this point All others are covered.

Parallel sessions

There were no report from WG1 WG2 WG4. This is now a concern.

Report from WG3 -- well advanced. The speakers for the beam design for NUMI and DUSEL need to be more beam (and if possible flux control) designers.

Concerning the joined sessions – no more news.

It was decided to organize a meeting dedicated to parallel and joined sessions on Thursday 23 June 14: UTC -- 16:00 CERN time
