

# HI-ECN3 Layout

Jean-Louis GRENARD – WP4

29-08-2024

# BDF/SHiP Target & Complex

# What do we need?

## P42 beam line change

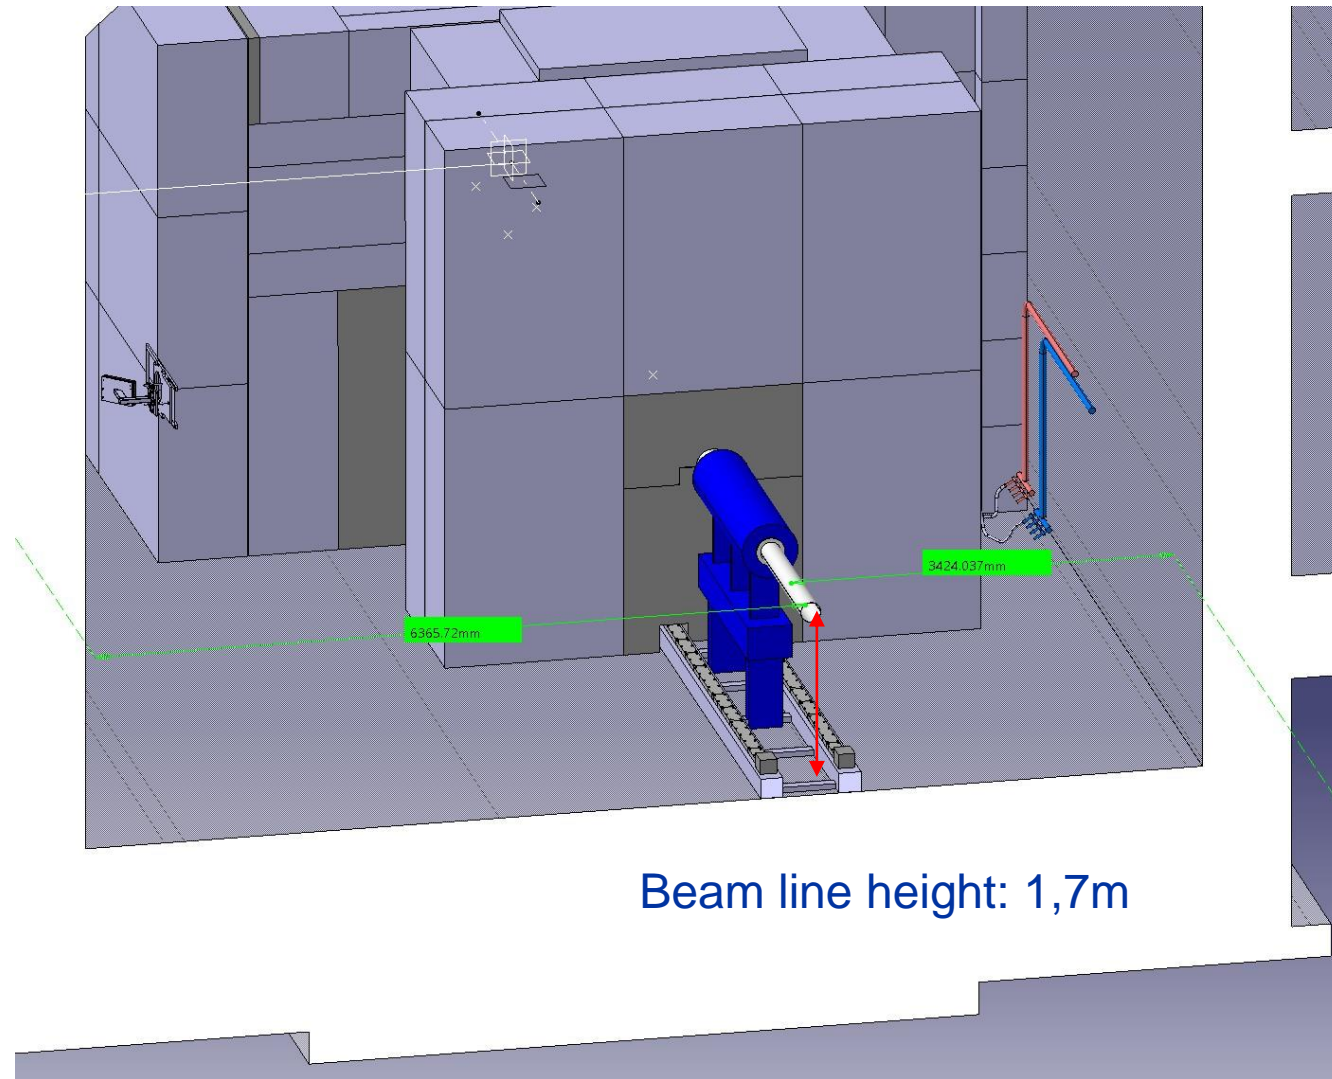

- Where do we start modifying the beam line?
- Vertical bend and Horizontal bend
- Dilution system
  - Position
  - Type and number of magnets
- Beam instrumentation
  - Type number position

# Target station

**What do we consider as the reference point?**

**Distance between last tungsten bloc and hadron stopper**

# Target station position across tunnel section
