

EuCAPT

The European Consortium for AstroParticle Theory

EuCAPT

Goals:

- to increase the exchange of ideas and knowledge;
- to coordinate scientific and training activities;
- to help scientists attract adequate resources for their projects;
- to promote a stimulating, fair and open environment in which young scientists can thrive.

Members:

139 member institutions

1922 individual members

75 council members

11 steering committee members

Director: Prof. Silvia Pascoli

Activities:

Scientific meetings

Exchange programs

Colloquia

Website (with community profiles)

Newsletter

...

EuCAPT Rapid Response Workshops

Provide a forum for prompt scientific exchange when exciting experimental, observational, or theoretical developments happen.

Goals: bring together and strengthen the community, facilitate new connections, and accelerate discoveries.

Format: Timely, online, focussed, interactive, short.

Get involved:

Meetings organised by the EuCAPT Workshop Task Force and local organisers.

Local organisers of today's meeting: Andrea Caputo, Miguel Escudera (both CERN)

Interested in organising another meeting in this series? Please contact [Matteo Fasiello](#).
