Firewall under attack: operational security rollercoaster

Thursday 7 November 2024 14:00 (30 minutes)

This talk will walk you through the challenges the ESnet security team faced during an attack against one of its firewalls. It covers the struggle and drama to access the data we needed and, in the end, highlights how nothing quite beats good old-fashioned, down-and-dirty system forensics.

Desired slot length

20

Speaker release

Yes
