HEPiX Benchmarking WG: Status Report

Monday 4 November 2024 15:45 (30 minutes)

HEPScore23 has been the official benchmark for WLCG sites since April 2023.
Since then, we have included community feedback and demand. The Benchmarking WG has started a new development effort to expand the Benchmark Suite with modules that can measure server utilization metrics (load, frequency, I/O, power consumption) during the execution of the HEPScore benchmark.
This enables a closer look at power efficiency and performance in the Grid environment.

We present the current state of our group and an overview of our current studies.

Desired slot length

15

Speaker release

Yes

Author: SCHNEPF, Matthias Jochen

Presenter: SCHNEPF, Matthias Jochen

Session Classification: Computing & Batch Services
