Shifting Hardware Landscape

Friday 8 November 2024 11:00 (30 minutes)

Advances in computing hardware are essential for future HEP and NP experiments. These advances are seen as incremental improvements in performance metric over time, i.e. everything works the same, just better, faster, and cheaper. In reality, hardware advances and changes in requirements can result in the crossing of thresholds that require a re-evaluation of existing practices. The HEPiX Techwatch working group was created to monitor trends in technology that will impact HEP and NP experiments in the future.

Desired slot length

10 minutes

Speaker release

Yes

Author: MISAWA, Shigeki (Brookhaven National Laboratory (US))

Presenter: MISAWA, Shigeki (Brookhaven National Laboratory (US))

Session Classification: Miscellaneous
