SWT2 site report

Monday 4 November 2024 11:00 (20 minutes)

The Southwest Tier-2 (SWT2) consortium is comprised of two data centers operated at the University of Texas at Arlington (UTA) and at the University of Oklahoma (OU). SWT2 provides distributed computing services in support of the ATLAS experiment at CERN. In this presentation we will describe the resources at each site (CPU cycles and data storage), along with other associated infrastructure required to provide these resources. We will conclude with a discussion of plans for the future evolution of SWT2.

Desired slot length

Speaker release

Yes

Author: BOOTH, Zachary (University of Texas at Arlington)

Co-authors: VARTAPETIAN, Armen (University of Texas at Arlington); SEVERINI, Horst (University of Oklahoma); SOSEBEE, Mark (University of Texas at Arlington)

Presenter: BOOTH, Zachary (University of Texas at Arlington)
