

BUGS LYRICS

Noone's

Ever bothered

With the networks of my mind

With the bugs i try to hide

Noone's

tried to read my source code

It hasn't been updated

Too old and borrowed

Noone but you. x4

Everyone knows

A broken machine

They'll judge the way you are wired

Or the language that you speak

Everyone's got secrets

Lines that they don't share

An executive dysfunction

they forgot about to care

Everyone but you. x4

You see something in my system

You make sense

Of my ones and Os

Its like you speak my language

Its like you know

Ones and Os

Noones looked

past my shell

But you ssh through

To listen to what i say
