

We can all contribute!

CERN Environmentally Responsible Procurement e-learning

- ✓ Developed by the IPT department to raise awareness about CERN, the environment and how procurement can reduce the Organization's footprint (1/3rd of the total footprint).
- ✓ Provides tangible and actionable information on what we can all do before and when procuring goods and services, as members of personnel, to minimise not only CERN's footprint but its overall impact on the environment.

Soon to be announced! Already available on the CERN learning hub: <https://cern.ch/cerp-elearning>

And on a final note: we need your help!

Please take a moment to complete this short questionnaire on mobility habits at CERN

Your responses will:

- support continuous improvements to our mobility infrastructure
- help calculate CERN's Scope 3 GHG emissions arising from mobility for the next Environment Report.

Thank you!

SCE Department and HSE Unit

<https://cern.ch/mobility-survey> (7 questions, requires CERN Login)

Please send your replies by 6 December

Find out more about CERN's extensive mobility solutions on <https://sce-dep.web.cern.ch/mobility-plan>

→ includes the previous mobility survey results (2023)
