**Neutrino
PLATFORM**

Welcome to Neutrinos@CERN

Filippo Resnati, Gunar Schnell, Francesco Terranova

CERN - 23rd January 2025

Intro

Workshop organised with the support of **Physics Beyond Colliders** of and **Neutrino Platform**.

Almost **300** (!) registrations, in presence capped at 110.

Setup a forum to favour the discussion of the Neutrino Community in **preparation** to the European Strategy for Particle Physics Update (**ESPPU**)

Themes touched at the workshop, but not limited to:

- Need of experiments in the DUNE and Hyper-Kamiokande era, including short-baseline, beam dump, and hadro-production experiments.
- Medium- and long-term plans for the ProtoDUNE detector complex and the Neutrino Platform.
- Neutrino physics with SHiP and the LHC far-forward projects.

Allocated time for **questions** after each contribution.

Dedicated session with ample time for **discussion** tomorrow afternoon.

We encourage the submission of summary documents for the discussion session.

This evening in this room will take place an informal discussion of **Early Career Researcher**.
