### $\gamma\gamma \rightarrow \mu^+\mu^-, \tau^+\tau^-$ at EIC

*Friday 28 February 2025 11:20 (20 minutes)*

The two-photon exclusive production of lepton pairs at the Electron–Ion Collider will open interesting research directions thanks to a very high luminosity and clean experimental conditions. A survey of the scientific potential of such studies is reported. In particular, we consider unique measurements of the proton elastic electromagnetic form-factors and a possibility of studying the anomalous electromagnetic dipole moments of tau leptons.
