What's new in Seafile for 2024

Thursday 20 March 2025 14:45 (30 minutes)

Seafile is a popular open-source file sync and share solution, used by many organizations (edu and for-profit). Its features include robust and efficient file syncing, cross-platform virtual drive clients, efficient usage of server resources, and encrypted libraries.

In this talk we'll present updates of Seafile in the year 2024. Notable updates:

- Redesigned user interface
- A new wiki module
- SeaDoc, a light-weight collaborative document editor, is production ready
