

Friday presentations

A cohesive, MISSION level, presentation of integrated sub-systems

Final design of healthcare unit/settlement, not each sub-team reporting!

Remember to cover:

Key assumptions (and any guiding principles)

How water is featured across the healthcare unit system

Plan for 1 month payload, 15 year crew joining

Key net impact calculations, and key decision justifications

Presentation Format

30 minutes @ 11:00am

Include prototype demonstration

Choose your technique/s *(hint, multiple or combined techniques may be useful!)*

You might consider such examples:

Categorising to physical and social aspects of your healthcare unit

Journey of a 'typical day in the life'

Timelines and roadmaps

Mind maps and diagrams that show inter-connections
