

13th Beam Telescopes and Test Beams Workshop

Contribution ID: 3

Type: **Talk**

The DESY II Test Beam Facility - Present and Future

Monday 19 May 2025 14:20 (20 minutes)

The DESY II Test Beam Facility is looking back at another successful year.

In this contribution, a review is given over the test beam period 2024 and the running period 2025. This includes the current status of the facility as well as recent developments of the infrastructure, improvements for the user community, and noteworthy events.

In addition, the current developments for the future of the facility after the upgrade of the accelerator complex for the planned synchrotron light source PETRA IV are presented and discussed.
