

HFM Annual Meeting 2025

Monday 10 February 2025 - Wednesday 12 February 2025

CERN

Book of Abstracts

Contents

| | |
|---|---|
| Discussion | 1 |
| Welcome and introduction | 1 |
| HFM Collaboration Board meeting | 1 |
| HFM visit of facilities | 1 |
| HFM Programme | 1 |
| tbd | 1 |
| tbd | 1 |
| tbd | 1 |
| tbd | 2 |
| tbd | 2 |
| FCC Feasibility Study | 2 |
| Muon Collider Study | 2 |
| WP2.3 - HTS conductors - UNIGE | 2 |
| WP2.5 - Demonstrator of the dielectric-insulated REBCO high field magnet coils - CERN | 2 |
| University of Twente - Future plans | 2 |
| Conclusions | 3 |
| tbd | 3 |
| WP3.1 - Nb3Sn robust performance double aperture 12T $\cos\Theta$ dipole models - CERN . . | 3 |
| WP3.2 - Nb3Sn single aperture $\cos\Theta$ bladder & keys 12T FALCON D dipole model - INFN | 3 |
| WP3.3 - Nb3Sn robust performance 12T long dipole prototype - CERN | 3 |
| tbd | 3 |
| tbd | 3 |
| tbd | 4 |

| | |
|---|---|
| WP3.7 - Nb3Sn ultimate performance common coil dipole demonstrator - CIEMAT | 4 |
| WP3.8 - Nb3Sn ultimate performance coil stress management dipole model - PSI/CHART | 4 |
| WP3.12 - KE5655 CEA collaboration on Nb3Sn ultimate performance R2D2 racetrack dipole demonstrator | 4 |
| tbd | 4 |
| USA talk 2 | 4 |
| tbd | 4 |
| WP4.2 - Structural materials for HFM magnets - CERN | 5 |
| tbd | 5 |
| WP4.4 - R&D on impregnation materials for HFM magnet coils - ETHZ/CHART | 5 |
| WP4.5 - Quench detection, protection and diagnostic methods for Nb3Sn and HTS high-field magnets - CERN | 5 |
| WP4.6 - Cryogenic and thermal management studies for HFM magnets - CERN | 5 |
| HFM infrastructure needs for HFM at CERN | 5 |
| The IRIS infrastructure in Italy | 5 |
| WP5.3 - Infrastructure needs for demonstrator and short magnet models - CERN | 6 |
| WP5.4 - Infrastructure needs for the construction of full-scale prototypes - CERN | 6 |
| WP5.5 - Instrumentation and measurement equipment needs for the HFM R&D programme - CERN | 6 |
| WP6.1 - Scientific and societal impact of the HFM R&D - CERN | 6 |
| RD1 summary and conclusion | 6 |
| RD 2 summary and conclusion | 6 |
| RD3 summary and conclusion | 7 |
| RD4 summary and conclusion | 7 |
| RD5 summary and conclusion | 7 |
| tbd | 7 |
| tbd | 7 |
| WP3.12 - Nb3Sn ultimate performance R2D2 racetrack dipole demonstrator - CEA | 7 |
| tbd | 7 |
| tbd | 7 |
| tbd | 8 |

| tbd | 14 |
| tbd | 14 |
| Welcome | 14 |
| FCC Program | 14 |
| MuCol Program Working Group | 14 |
| HFM Programme Developments | 14 |
| US-MDP LTS and HTS Magnets | 14 |
| High field magnet for SppC | 15 |
| HFM Input to the ESPP | 15 |
| CERN technology development program | 15 |
| CERN 14 T block dipole - BOND | 15 |
| INFN and CERN 12 T magnet | 15 |

| | |
|---|----|
| CEA block program R2D2 and F2D2 | 15 |
| CIEMAT common coil design | 15 |
| PSI stress managed common coil | 16 |
| Updates from the Insulation Working Group | 16 |
| Updates from the Coil Composite Working Group | 16 |
| Updates from the BOX Working Group | 16 |
| Progress on Quench Protection and Transient Modeling at CERN | 16 |
| Progress on Cryogenics Studies at CERN | 16 |
| Progress on instrumentation and simulation in US-MDP | 17 |
| Progress on Nb ₃ Sn Conductors (including CERN and BAF activities) | 17 |
| UniGE Progress on Nb ₃ Sn conductors | 17 |
| CERN Progress on HTS Conductors | 17 |
| Progress on ReBCO Tape Research at KIT | 17 |
| Progress on IBS at SPIN | 17 |
| Feedback and Discussion on HFM Modes of Collaboration | 17 |
| Progress on ReBCO studies at UniGE | 18 |
| Transverse-Pressure Experiments on Bi-2212 at uTwente | 18 |
| MuCol solenoids and collider magnets | 18 |
| Towards HTS ReBCO HFM magnets at CEA | 18 |
| Towards HTS ReBCO HFM magnets at CERN | 18 |
| Towards HTS ReBCO HFM magnets at INFN | 18 |
| Towards HTS ReBCO HFM magnets at PSI | 18 |
| Closing Session | 19 |
| Discussion on HTS ReBCO Conductor/Magnet challenges | 19 |
| Feedback of HL-LHC Magnets to HFM | 19 |
| KEK Progress on Nb ₃ Sn Conductors | 19 |

55

Discussion

56

Welcome and introduction

Corresponding Author: mike.lamont@cern.ch

57

HFM Collaboration Board meeting

Conference room: 30/7-010

Indico page will be created

FCC Feasibility Study

Corresponding Author: michael.benedikt@cern.ch

Introduction and State-of-the-Programmes / 66

Muon Collider Study

Corresponding Author: daniel.schulte@cern.ch

LTS Magnets / 67

WP2.3 - HTS conductors - UNIGE

Corresponding Author: carmine.senatore@unige.ch

LTS Magnets / 68

WP2.5 - Demonstrator of the dielectric-insulated REBCO high field magnet coils - CERN

Corresponding Authors: amalia.ballarino@cern.ch, c.barth@cern.ch

LTS Magnets / 69

University of Twente - Future plans

Corresponding Author: a.u.kario@utwente.nl

70

Conclusions

Introduction and State-of-the-Programmes / 71

tbd

LTS and HTS conductors / 72

WP3.1 - Nb₃Sn robust performance double aperture 12T cos Θ dipole models - CERN

Corresponding Author: diego.perini@cern.ch

LTS and HTS conductors / 73

WP3.2 - Nb₃Sn single aperture cos Θ bladder & keys 12T FALCON D dipole model - INFN

Corresponding Authors: stefania.farinon@ge.infn.it, diego.perini@cern.ch

LTS and HTS conductors / 74

WP3.3 - Nb₃Sn robust performance 12T long dipole prototype - CERN

Corresponding Author: attilio.milanese@cern.ch

LTS and HTS conductors / 75

tbd

LTS and HTS conductors / 76

tbd

LTS and HTS conductors / 77

tbd

LTS and HTS conductors / 78

WP3.7 - Nb₃Sn ultimate performance common coil dipole demonstrator - CIEMAT

Corresponding Authors: fernando.toral@ciemat.es, diego.perini@cern.ch

LTS and HTS conductors / 79

WP3.8 - Nb₃Sn ultimate performance coil stress management dipole model - PSI/CHART

Corresponding Authors: bernhard.auchmann@cern.ch, attilio.milanese@cern.ch

LTS and HTS conductors / 80

WP3.12 - KE5655 CEA collaboration on Nb₃Sn ultimate performance R2D2 racetrack dipole demonstrator

Corresponding Authors: etienne.rochepault@cern.ch, juan.carlos.perez@cern.ch

Introduction and State-of-the-Programmes / 81

tbd

LTS and HTS conductors / 82

USA talk 2

HTS Conductor and ReBCO Magnets / 83

tbd

HTS Conductor and ReBCO Magnets / 84

WP4.2 - Structural materials for HFM magnets - CERN

Corresponding Author: cedric.garion@cern.ch

HTS Conductor and ReBCO Magnets / 85

tbd

HTS Conductor and ReBCO Magnets / 86

WP4.4 - R&D on impregnation materials for HFM magnet coils - ETHZ/CHART

Corresponding Authors: theo.tervoort@mat.ethz.ch, roland.piccin@cern.ch

HTS Conductor and ReBCO Magnets / 87

WP4.5 - Quench detection, protection and diagnostic methods for Nb3Sn and HTS high-field magnets - CERN

Corresponding Author: mariusz.wozniak@cern.ch

HTS Conductor and ReBCO Magnets / 88

WP4.6 - Cryogenic and thermal management studies for HFM magnets - CERN

Corresponding Authors: rob.van.weelderen@cern.ch, patricia.tavares.coutinho.borges.de.sousa@cern.ch

RD5 - Infrastructures and Measurement Techniques / 89

HFM infrastructure needs for HFM at CERN

Corresponding Author: franco.julio.mangiarotti@cern.ch

RD5 - Infrastructures and Measurement Techniques / 90

The IRIS infrastructure in Italy

Corresponding Author: lucio.rossi@cern.ch

RD5 - Infrastructures and Measurement Techniques / 91

WP5.3 - Infrastructure needs for demonstrator and short magnet models - CERN

Corresponding Authors: diego.perini@cern.ch, juan.carlos.perez@cern.ch

RD5 - Infrastructures and Measurement Techniques / 92

WP5.4 - Infrastructure needs for the construction of full-scale prototypes - CERN

Corresponding Author: attilio.milanese@cern.ch

RD5 - Infrastructures and Measurement Techniques / 93

WP5.5 - Instrumentation and measurement equipment needs for the HFM R&D programme - CERN

Corresponding Authors: stephan.russenschuck@cern.ch, lucio.fiscarelli@cern.ch

RD6 Forum - Scientific and Societal Impact Forum / 94

WP6.1 - Scientific and societal impact of the HFM R&D - CERN

Corresponding Authors: enrico.chesta@cern.ch, linn.kretschmar@cern.ch
