

The Neutron Monitor of Mexico City as a tool for Space Weather Analysis

Monday 6 January 2025 14:50 (15 minutes)

An overview of the space weather events observed by the Neutron Monitor of Mexico City is presented. The detector is located at the Mexico City Cosmic Ray Observatory (MX-CRO) and it has been operating since 1990. The relevance and scope of its data for space weather analysis is discussed.

Presenter: MONTERDE-ANDRADE, Franando (UNAM)

Session Classification: Physics / Space Weather, Data Analysis, and Results
