

EXECUTIVE SUMMARY

2023 2024

- All requests fulfilled (including changes)
- Overall beam quality/stability/availability was more than fine (we ran 90% of the time @PS)
- Prompt response from beam physicists if/when needed
- Excellent support from transport, safety, RP

SUGGESTIONS

Looooooong time ago it was proposed to buy more «DESY table» like devices, will this materialize ?

Having more tables would spare some time and make users's life easier
Additional desks in the area quite appreciated

Could procedures be made a bit easier/simpler ?

Beam request **OK**, EURO-LABS, can we clone a safety inspection request ?

Reaching the ISIEC form isn't straightforward (add link to indico ?)

Sharing btw T9/T10, can spills automatically reassigned if T9(10) open ?

Improved, still manual, afaik

Number of spills is the critical item
