Roadmap to LS3: CERN's Linux Strategy

As CERN prepares for the third Long Shutdown (LS3), its evolving Linux strategy is critical to maintaining the performance and reliability of its infrastructure. This presentation will outline CERN's roadmap for Linux leading up to LS3, highlighting the rollout of RHEL and AlmaLinux 10 to ensure stability and adaptability within the Red Hat ecosystem. In parallel, we will discuss efforts to enhance the adoption of Debian as a robust alternative, bolstering flexibility and long-term sustainability as part of a comprehensive dual-ecosystem approach.
