## **IDAF @ DESY: Interdisciplinary Data and Analysis Facility: Status and Plans**

*Tuesday 1 April 2025 14:50 (30 minutes)*

DESY operates the IDAF (Interdisciplinary Data and Analysis Facility) for all science branches: high energy physics, photon science, and accelerator R&D and operations.

The NAF (National Analysis Facility) is an integrated part, and acts as an analysis facility for the German ATLAS and CMS community as well as the global BELLE II community since 2007.

This presentation will show the current status and further plans of the implementation, driven by use cases of the different user communities.

### **Desired slot length**

### **Speaker release**

Yes

**Author:** KEMP, Yves (Deutsches Elektronen-Synchrotron (DE))

**Presenter:** KEMP, Yves (Deutsches Elektronen-Synchrotron (DE))

**Session Classification:** Mid-long term evolution of facilities (Topical Session with WLCG OTF)

**Track Classification:** Mid-long term evolution of facilities (Topical Session)
