AUDITOR. First results of the assessment by the WLCG sites

Wednesday 7 May 2025 14:20 (1h 30m)

AUDITOR (Accounting Data Handling Toolbox for Opportunistic Resources) is a flexible and extensible accounting system designed to support a wide range of use cases and infrastructures. Its integration with APEL enables it to function as a generic component within the WLCG accounting infrastructure, tracking the usage of various types of site computing resources. Several WLCG sites have evaluated AUDITOR, and the outcomes of these assessments will be reviewed and discussed.

Requested talk length

Presenters: PASCOLINI, Alessandro (Universita e INFN, Bologna (IT)); KLEINEMUHL, Alexander Raphael (Bergische Universitaet Wuppertal (DE)); ALANDES PRADILLO, Maria (CERN); FISCHER, Max (Karlsruhe Institute of Technology); BOEHLER, Michael (Deutsches Elektronen-Synchrotron (DE)); BOEHLER, Michael (University of Freiburg (DE)); HARTMANN, Thomas (Deutsches Elektronen-Synchrotron (DE))

Session Classification: WLCG
