

18 months into the CERN cyber-security audit

Sunday 21 September 2025 11:15 (1 hour)

With thorough 2023 cyber-security audit at CERN, the IT department and the CERN Computer Security Office as well as the Organization as a whole has been tasked with 95 different work packages to improve their computer security posture. This presentation will go to their implementation and deployment, the successes and the areas creating additional problems
